

Sunburst Pool Check & Procedures

Pool Opening 9 AM

- Unlock master lock on pool gate
- Open red tool box (Combination 1900)
- Perform chemical test on pool water and record results
- Check bathrooms & pool area for trash and debris
- Net debris from pool surface

Pool Chemical Check (Aqua check 1 min video @ Aquachek.com)

- Take one test strip from bottle
- Press top button of reader to turn on (2.2 flashes)
- Press bottom button (countdown 3,2,1) Dip displays
- Dip test strip 6" into water
- Shake water from strip
- Set test strip into reader (**IMPORTANT: Do not slide strip. Set at 45° angle and then lay down**)
- Record Cl & pH results

Chlorine level should be between 3 - 9

PH level should be between 7.2 – 7.8

Record the levels on the record sheet and leave it in the red & black tool box. Leonard will make the necessary adjustments in the pool. **Please do not add salt or chemicals to the pool.**

Pool Closing 9 PM

- Straighten pool chairs
- Put away toys and clothing left in the Lost & Found basket
- Clean restrooms if needed
- **Sunday Night:** Empty trash cans from bathrooms and place trash bin on the curb
- Lock the master pool gate
